

Theme Colors in Storyline 360

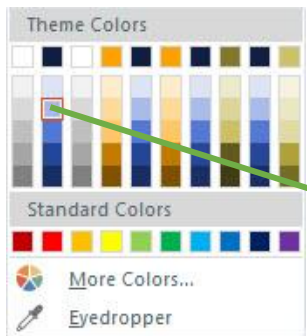

The text/background colors make text easily readable when applied to shapes. For example, dark text is designed to be readable when placed in lighter-colored shapes. You will see these applied to your quick shape style options. Dark 2 is also used as the background color in the Text Styles drop-down list when you're using light text on a dark background.

Accent 1 is the default fill color for shapes, captions, check box styles 1 and 2, and radio button styles 1 and 2. It's also the default color for markers in 360° image interactions.

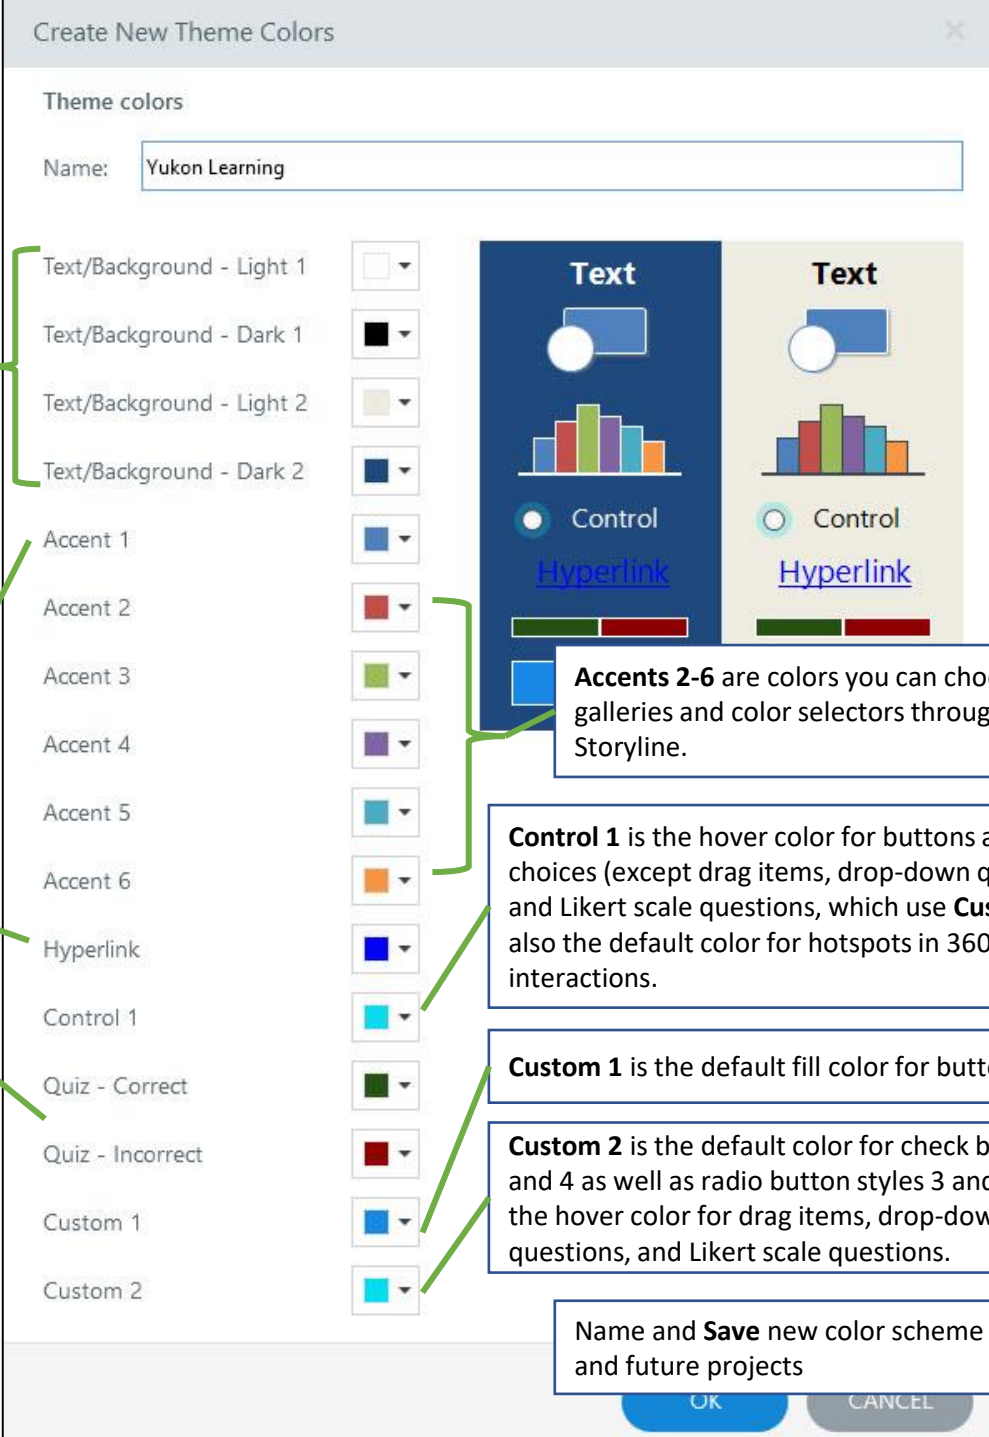

Hyperlink is the color used for text hyperlinks.

Quiz – Correct & Incorrect are the colors used for quiz elements, such as icons and review banners.

Using theme colors throughout your project lets you update an entire module by adjusting the theme.

This text variation position is used for the text in the Feedback Layers in the Modern Template

Custom 1

Custom 2

Accents 2-6 are colors you can choose in style galleries and color selectors throughout Storyline.

Control 1 is the hover color for buttons and answer choices (except drag items, drop-down questions, and Likert scale questions, which use **Custom 2**). It's also the default color for hotspots in 360° image interactions.

Custom 1 is the default fill color for buttons.

Custom 2 is the default color for check box styles 3 and 4 as well as radio button styles 3 and 4. It's also the hover color for drag items, drop-down questions, and Likert scale questions.
